

LETTER OF RECOMMENDATION

To Whom It May Concern,

I am pleased to confirm that Mr. Raman Nafarieh, representing the Iranian Youth Science and Technology Center (IYSTC), participated in the INNOVERSE 2025 International Invention and Innovation Expo.

Raman presented his research project entitled:

“Evaluation of a Novel Herbal Nanogel Formulation on Skin Cancer Cells Utilizing the MTT Assay.”

In recognition of his participation, research presentation, and achievement at the competition, he was awarded a Bronze Medal.

His project explored a biomedical research topic involving a plant-based nanogel formulation and its laboratory evaluation in relation to skin cancer cells. The subject connects nanotechnology, plant-derived compounds, biomedical research, and potential drug-delivery applications. It also addresses a field of international importance, as cancer research and the development of innovative biomedical approaches remain significant global public-health priorities.

Raman’s participation in INNOVERSE 2025 and his Bronze Medal demonstrate his interest in scientific research and his ability to present a biomedical project in an international innovation environment.

Based on his documented participation and achievement at INNOVERSE 2025, I am pleased to recommend him for relevant academic, scientific, research, and youth-innovation opportunities.

Sincerely,

John Nik
